

Parquet Carré A Statement.

Only at HARO – Inspired by our love of wood.

As unique as a work of art

HARO Carré stands for uncompromising quality and timeless elegance. Unlike classic parquet floors or end-grain products made from fir **HARO Carré** combines the resilience of oak with the latest manufacturing technology – for a durable, almost maintenance-free, and aesthetically exceptional flooring experience.

Uncompromising quality and lasting durability

- ❑ 4.2 mm thick oak wear layer: approximately 2.5 times harder than oak Plank 1-Strip, extremely resistant to pressure and abrasion, can be resanded at least three times, and has a lifespan of up to 45 years.
- ❑ 3-layer structure for maximum dimensional stability, a permanently seamless appearance, and excellent dimensional accuracy.

Superior functionality and comfort

- ❑ Optimal for underfloor heating due to low thermal resistance ($0.14 \text{ m}^2\text{K/W}$).
- ❑ 30-year manufacturer's guarantee in the residential sector, certified for promoting a healthy living environment (Blue Angel, LEED, DGNB).
- ❑ Easy to clean, individual elements can be repaired quickly, no transition mouldings required for glue-down installation.
- ❑ Perfect integration into modern interior concepts.

Exclusive design and versatility

- ❑ Large end-grain sections, calmer appearance in contrast to the small sections of other end-grain products.
- ❑ Five individual design variants for countless design options.
- ❑ Precise workmanship without wind cracks and raised edges for a flawless overall appearance.

Carré Oak Blue-Grey SELECTIV

ID no. 539 074 (oleovera)

The exclusive HARO Carré Parquet combines the extraordinary look of end-grain wood with the technical precision of modern pre-finished parquet. Visible annual rings, distinctive textures and the highest level of durability make Carré the perfect floor for heavily frequented rooms with high aesthetic standards.

Carré Oak Silver Grey SELECTIV
