Natural beauty is not a matter of chance

HARO stands for natural beauty. Over the decades, we have learned what makes a truly beautiful floor. This knowledge and our enthusiasm for the unique beauty of wood inspire us every day. You will feel this with each of our parquet floors: every single floorboard is a piece of nature in your home. Whether you choose Strip Allegro or Plank 1-Strip Prestige, real wood parquet will give your home a timeless, modern, yet warm atmosphere for many years to come. And thanks to the large, diverse selection, parquet floors are suitable for every interior style: from rustic ambience to modern looks, from young living to elegant residing.

Quality from Germany's market leader

As a family business, we think ahead and approach everything we do in a considered and sustainable manner. For us, this includes the careful use of all resources. For instance, we only use wood from our own and certified forestry. This ensures that the amount of wood taken from the forests never exceeds the amount that can grow back again. And thanks to our biomass power plants and our hydroelectric power plant that uses the power of the Sims river, we are self-sufficient in energy – in addition to our production, we can even supply 8000 households with electricity.

To become a market leader, it takes more than sustainable action and high quality products. It also requires expert advice and first-class installation skills of the craftsmen and installers. The expertise we have gained is the basis for becoming a leading supplier of parquet on the world market. To ensure that it stays that way and that every parquet floor that comes from HARO is naturally beautiful, guaranteed to be of high quality, and provides long-lasting pleasure – that is what we work for every single day .

Values speak louder than words

Values are more than just words:
They shape our thoughts and actions – every single day.

Committed to sustainability

The more than 150-year history of our family business is characterised by sustainable thinking and action. We are aware of our responsibility and embrace it with enthusiasm and commitment – for society, for the environment, for people.

For a natural and healthy living environment

Not only are HARO floors beautiful to look at and to touch, they are also free from any harmful substances. For this, HARO was awarded the 'Blue Angel' quality label. This means that you can rest assured that our floors contribute to a high standard of healthy living and a pleasant ambience in the home.

Guaranteed high quality

We know what it takes to produce naturally beautiful, high-quality floors. We put this knowledge into practice with great care – in every single floorboard, right down to the last detail. This is something we are proud of, and we prove it with the best quality.

Made with passion

HARO is passion for natural beauty. We love processing and refining natural materials. Every single day, we use all our expertise and experience to ensure that you can feel the perfection of nature in our floors.

Made in Germany

As Germany's leading parquet manufacturer, we combine traditional craftsmanship with new technology in Rosenheim, Bavaria. This makes it possible for us to produce floor coverings of the highest quality. For more comfort when it comes to installation and maintenance, and for long-lasting pleasure in living, working and living.

2-layer Parquet: naturally beautiful and award-winning

HARO Parquet Floors have been awarded many quality labels that speak for themselves and offer other tangible benefits that go beyond the product itself.

- High-quality product with glue-down installation by your craftsman.
- Five different designs offer interesting installation options, from irregular installation layouts to herringbone and offset cubes.
- The full glue-down installation reduces indoor and footfall sound. 2-layer Parquet offers a wonderful walking sensation.
- Naturally suitable for underfloor heating.

Parquet for every room

What makes HARO so special: All designs are available in all classic colours as well as the surface finishes naturaDur and naturaLin plus. This means that you can easily furnish your entire house or flat with the same floor. The look is consistent and you can choose the design that best suits each room. For example, Plank 1-Strip Maxim in the living room, Plank 1-Strip Prestige in the hallway and office, Strip Allegro in the dining room. Everything is individually matched to the respective room, and yet consistent.

The perfect floor for large rooms: Plank 1-Strip Maxim

The classic Plank 1-Strip format gives large rooms a spacious and elegant look. This makes Plank 1-Strip Maxim the ideal floor for rooms where a lot of floor space is visible.

Formats

Dimensions: 180 (173) x 2200 mm

The design for modern rooms: Plank 1-Strip Prestige

With its balanced width-to-length ratio, Plank 1-Strip Prestige is ideal for both small and large rooms.

Whatever the size of the room, several floorboards in a row are visible, which creates a varied appearance of the surface. For a particularly classic/elegant living atmosphere, installation in herringbone pattern is possible, too.

Dimensions: 120 x 1000 mm

**The perfect floor for small and medium-sized rooms:
Strip Classico**

Strip Classico combines a classic, timeless design of the boards with a particularly harmonious surface appearance. It conveys tranquillity without appearing dull. The possibility of a herringbone pattern installation creates exciting surface patterns.

The vibrant floor with versatile installation options: Strip Allegro

The classic, timeless design of the harmonious strips adds structure to every room. Strip Allegro gives rooms vibrancy and is always a perfect fit – regardless of the room's size or furnishing style. To create unique effects, Strip Allegro offers the option of herringbone installation as well as a variety of special installation methods, such as cube patterns or mosaics.

Dimensions: 85 x 771 mm

Dimensions: 70 x 490 mm

**Do you need more information?

Different looks through grading

Plank 1-Strip Maxim / Plank 1-Strip Prestige

In connection with the overall furnishing of the room, the respective grading significantly shapes the floor's appearance.

Markant

What makes it so special is its calm naturalness. Small knots and subtle differences in colour give the floor an elegant vibrancy.

Sauvage

An expressive look
with a larger amount of knots
reflect the natural growth of
the tree.

Natural differences in colour
give the floor an authentic
vibrancy.

A floor's character is shaped by the grading

Strip Classico and Strip Allegro

Small-format boards generally have a vibrant look. Here, the grading plays an important role.

Trend

The grain brings calm to the varied surface look, which is created by the smaller board format. Small knots give the room an interesting and varied look.

Naturale

The name of this grading says it all: natural colourations, sometimes lighter, sometimes darker. Knots, ranging from small to medium size. This guarantees an authentic appeal.

Colour worlds for the perfect interior design

For better orientation in our comprehensive range of 2-layer Parquet Floors, we have classified the entire range of classic oak colours into 5 colour worlds and selected the matching gradings and surface finishes.

**Colour World
White**

**Colour World
Nature Light**

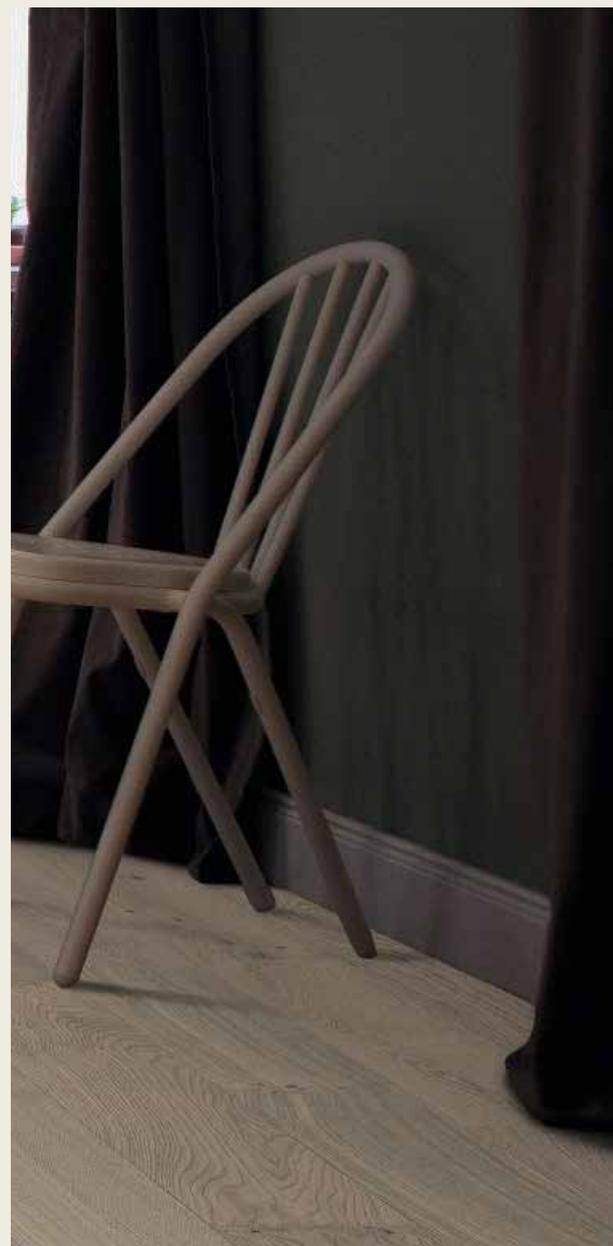

**Colour World
Nature Medium**

**Colour World
Nature Dark**

**Colour World
Grey**

Three surface finishes – unique properties

The finish of a surface not only emphasises the natural beauty of a parquet floor, but also protects its natural ambience and offers reliable protection with little need for cleaning and care. With the three HARO finishes naturaDur, naturaDur High Performance and naturaLin plus, you can precisely match your parquet to its type of use and the desired look.

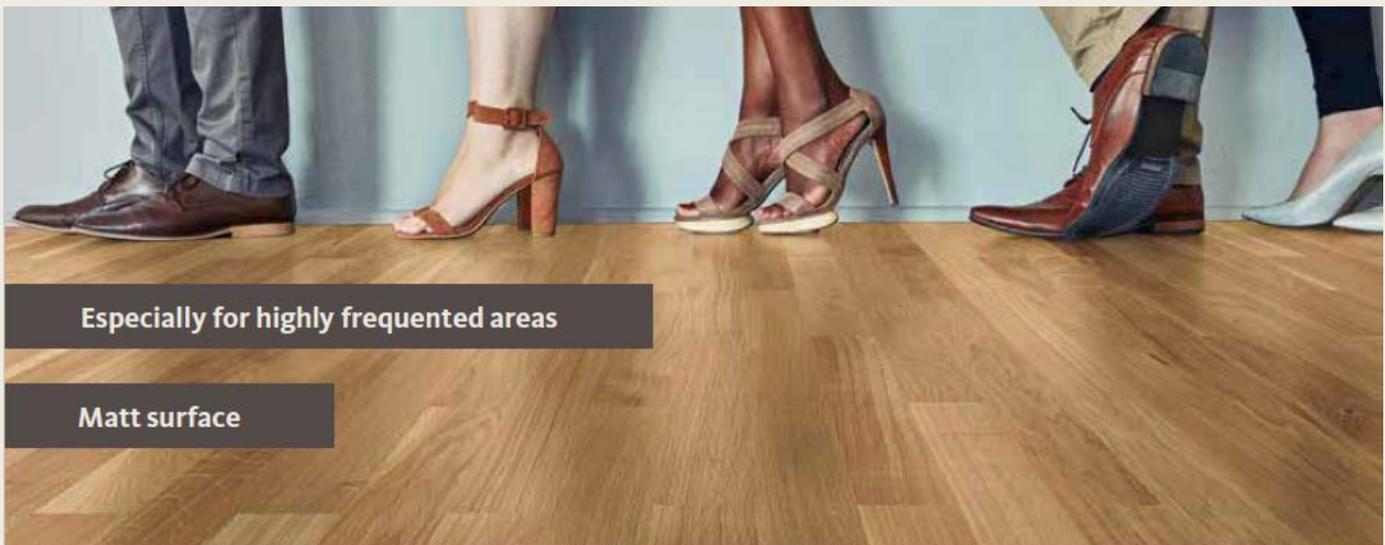

The revolutionary premium surface finish naturaDur combines the soft feel and the beauty of a natural oil surface. At the same time, the finish is a durable special varnish that protects the parquet floor against signs of wear and tear while making cleaning and maintenance even easier.

The breathing natural oil surface naturaLin plus perfectly sets the scene for the natural character of parquet. The oil penetrates the wood, protects the parquet, and gives it a unique matt look and a natural feel.

An additional benefit: the surface is particularly easy to clean.

Especially for highly frequented areas

Matt surface

Premium Finish
naturaDur High Performance

The surface finish for heavy loads

naturaDur High Performance is a highly durable and matt varnish surface, which is also suitable for use in commercial settings. Special UV-cured acrylic resins make the naturaDur High Performance parquet surface resistant to abrasion, scratches and stains.

Quality through and through

The parquet's 2-layer construction with grains running in different directions reduces the natural swelling and shrinking of the wood by up to 70%. This is also supported by the direct connection to the subfloor by the full glue-down installation. 2-layer parquet is also a great choice in terms of sustainability, eco-friendliness, and value for money.

1 High-quality precious-wood layer

approx. 3.5 mm thick top layer of selected precious wood.

Protected by a surface finish, such as *naturaLin plus*.

2 Stable base layer

Solid spruce fingerstrips as core layer.

Exciting surface patterns through a variety of installation methods

In addition to the classic installation in a regular or irregular pattern, Strip Allegro, Strip Classico and Plank 1-Strip Prestige offer further options for designing rooms and creating visual counterpoints.

Herringbone pattern:

The herringbone installation pattern is the classic installation method for 2-layer parquet. Suitable for every room size and every interior design, the installation pattern fills every room with vibrancy.

Strip Allegro / Strip Classico / Plank 1-Strip Prestige

Herringbone pattern Classic:

The traditional method of herringbone installation, where 2 boards are installed in parallel instead of a single offset. This form of installation creates particularly impressive light reflections.

Strip Allegro / Strip Classico / Plank 1-Strip Prestige

Irregular pattern:

The irregular pattern, also known as wild installation pattern, also consists of strips installed in parallel rows. The difference is that the strips are offset irregularly.

Strip Allegro / Strip Classico / Plank 1-Strip Prestige

Basket weave:

Especially in large rooms, the installation in the form of square surfaces leads to an extraordinary spatial effect that turns every room into a stately salon. In combination with modern furnishings, it is an impressive design highlight.

Strip Allegro

Ladder pattern:

The basis of a ladder pattern or ladder installation is parallel installation. Two types of installation alternate: next to a row of parallel strips, a vertically single row is inserted.

Strip Allegro / Strip Classico

HARO Accessories and more

Always a perfect match.

We are committed to giving you the best support we can. It is only natural that we also offer the technically suitable adhesive for you to install the floors. And to ensure that the rooms have the right finish after the expert installation, you will get skirting boards in the perfect colour to match your floors.

To turn individual rooms in an apartment or house into a harmonious whole, you can also use our parquet to design the staircase and thus integrate it into the overall design. With our block steps, panelling for the side of the stairs, end mouldings and more, it's child's play.

To maintain the value of the expertly installed 2-layer parquet and for regular maintenance, we have developed the matching ecological cleaning and care series 'clean & green'. Simple and safe to clean and maintain.

Skirtings

Matching or contrasting? Skirtings enable transitions between the floor and the wall that are visually and functionally attuned to your desired floor. Naturally, they are also available in water-resistant versions.

Adhesives

Very low emissions, solvent-free, remains flexible after hardening, ready to use, water-free 1-component adhesive for glue-down installation of HARO Parquet. Suitable for use over underfloor heating. Awarded with the Blue Angel label.

Maintenance and care with 'clean & green'

The floor care series for quick, easy, effective and ecological cleaning and maintenance of all floors.

HARO Parquet Floors will convince you. Guaranteed.

Every day, our employees put great expertise, experience and passion into their work. That is why we are certain that HARO's products will convince you with their outstanding quality. We emphasise this with our warranties of 20 and 25 years, which is up to twice as long as those of other manufacturers.

The fact that quality is a top priority at HARO is proven by numerous certificates from internationally recognised institutions. As a member of important industry organisations and associations, we are also committed to quality, transparency and sustainability that reach beyond our company.

HARO warranty (up to 25 years)

In addition to the statutory warranty terms, HARO also provides additional warranties for various product groups. Please note the respective warranty conditions.

Made in Germany

Our quality floors are of the highest-quality German workmanship.

ISO Certificates

HARO's energy management is certified according to ISO 50001: 2013.

DIN EN ISO 14001: 2004 stands for active environmental management. We have been a holder of the Bavarian Quality Award since 1998, and of the PEFC seal since 2002.

Since 1995, we have been certified according to DIN EN ISO 9001:2008. This ensures consistent product quality.

CE Certificate

The CE label stands for compliance with all European safety and health directives.

Certificates

The Blue Angel proves the environmental compatibility of our products: blauer-engel.de/uz176, blauer-engel.de/uz120

The French VOC label certifies that the emissions of DISANO Design Floors by HARO are completely non-hazardous.

Memberships

We have been PEFC certified since 2004. This means we can assure you that the wood we process comes from sustainably managed forests.

We are a member of the Verband der Deutschen Parkettindustrie e.V. (Association of the German Parquet Industry) and of the FEP, the European Federation of the Parquet Industry.

www.realwood.eu

Bring your favourite floor into your home. Right now.

Almost as exciting as a test drive, but definitely less complicated. With the HARO Room Visualizer, you can install your favourite HARO Parquet in your own four walls – easily, virtually and without obligation.

Does your dream floor match your beloved couch or the colour of the newly painted kitchen backsplash? Which board format and which colour will make your home office look particularly spacious? Virtually install your favourite parquet with the HARO Room Visualizer – with just one click. Simply visit haro.com/roomvisualizer and get started.

This is how it works:

1. Visit haro.com/roomvisualizer
2. Take a photo of your room or upload an existing photo
3. Select your desired parquet floor
4. Be amazed at how good your favourite parquet looks in your home

*Test our HARO Room
Visualizer now.*
